

Registered Apprenticeship:

The pathway to a 4 year degree

Apprenticeship is a combination of structured on-the-job training (OJT) with direct supervision by a craft-person mentor, and related classroom instruction, where workers learn the practical and theoretical aspects of a highly skilled occupation, while earning college credit and a living-wage salary.

Apprentices who complete their program, earn approximately \$300,000 more over the span of their career than non-apprenticeship participants.

- United States Department of Labor
